

HOPPER CAMPAIGN NECESSARY AGAIN THIS YEAR

The farmers of Alberta are confronted in this year's outlook. The lesser migratory or stubble grasshopper (Melanoplus mexicanus) is not as generally abundant as last season, but is present in all localities. The two striped grasshopper (M. bivittatus) which is much more numerous in numbers, and is present in only a few districts. The roadside grasshopper (Camnula pellucida) is abundant in all the very severely infested areas, and shows some increase and spread over last season. This last species largely confines its egg-laying to roadsides, headlands and over grassed pastures. The seriousness of the infestation in any given place will depend largely on the weather during the spring. If the season should be as dry and warm as in 1934, the grasshoppers will cause considerable trouble and crop loss. On the other hand, if there is a week of cold weather soon after the young grasshoppers hatch, the danger will undoubtedly be greatly lessened.

No farmer can afford to ignore the grasshoppers this coming season. No farmer should be guided by the number of grasshoppers which were present on his own farm during July and August last year. Where the roadside grasshopper was abundant along roadsides, headlands and over-grassed pastures, particular care must be maintained to see that the young grasshoppers hatching from these eggs beds do not spread into nearby fields.

It is recommended that all land to be cropped except that summer-fallowed in 1934, be shallow cultivated as soon as possible, particularly that in the areas more severely infested. The object of this cultivation is to expose the eggs on the surface of the soil so that they will dry out instead of hatching. The eggs at present are buried within one and one-half inches of the surface, and if the cultivators or discs are set so as to dig deeper than this, they are likely to keep the eggs covered and defeat the purpose of the cultivation. Wherever the mouldboard plow can be used, good control can be obtained by ploughing to a depth of more than four inches and then packing the soil. For this ploughing to be effective the furrow slices must be turned completely upside down, so that the eggs will be well buried under packed soil. Fields that were well summer-fallowed in 1931 and the soil was not sold after July 1st are not likely to be infested with eggs, and need not be cultivated as a

VOLUME 14; Number 11

PUPILS MUSICAL EVENT

Mrs. George Wilson L.T.C.M. will present her pianoforte students in a musical in Carbon City Church on Saturday evening, April 20, at 8:30 o'clock under the auspices of the Carbon Ladies' Aid.

An interesting feature of the evening will be the presentation of certificates and prizes awarded to successful pupils at the recent examinations by Mrs. E. J. Anderson, Calgary, representative of the Toronto Conservatory of Music.

Admission—adults, 50c; children under twelve, 10c.

"Brethren," said a colored preacher, "You have come to pray for rain. Brethren, do foundation on religion and faith. Where am your faith? You come to pray for rain and not one of you brings his umbrella."

A hailstorm and set of instruments released by the Dominion Meteorological Bureau were found recently a short distance from Irwinville by Angus McCune. The balls are as released in Calgary early in February for the purpose of testing weather and other air conditions.

If rumors are true it is likely that an Alberta election will be held in June. All political parties and associations are becoming active.

Proof of the late spring is that regular curling schedules are still being played at Rockyford, Carleton Place, Yukon, Nanaimo, Strathmore and other Alberta towns.

The first hatching of the economic grasshoppers in 1935 was reported on May 28 while in 1934 eggs began to hatch on April 25. The time of hatching this spring will depend on the weather conditions, but with warm dry weather in April eggs may begin to hatch any time after April 20th.

As soon as hatching is underway roachmen bait should be secured from the local mining station and spread as thinly as possible among the hopper areas. A careful and thorough ploughing of those restricted areas where grasshoppers are hatching may save considerable time and expense later. This is particularly true of the concentrated hatching grounds of the roadside grasshopper, where there are usually enough eggs laid in less than one acre to supply the grasshoppers that will later spread over several hundred acres.

Village and Municipal Assessment Rates are Low

ALBERTA NEWS

The regular monthly meeting of the village council was held in the office of the secretary-treasurer on Monday, April 1st. All councillors were present.

The minutes of the last meeting were read and adopted, also correspondence was read and filed.

There had previously been no by-law providing for the taxing of bakeries, and when no tax is levied for the village the government does so, so at this meeting the secretary-treasurer was instructed to draw up a bill. This by-law, number 43 was given three readings and was passed unanimously.

It was moved by L. G. McClelland, seconded by Jas. Flavin that the 1931 assessment be adopted for 1935 with alterations added or deleted as required. The assessment rate for this year was set at 13 mills.

No alterations were made to any by-laws, but it was recommended that all dog, dairy, milk, bakery and business licenses be enforced.

Dr. G. McFarlane was appointed Health Officer for the village with a salary of \$50 per annum.

The Municipal Council met on Tuesday, April 2 with the following in attendance: Reeve, S. N. Wright, deputy Reeve, George Webber, councillors, J. J. O'Hanlon, J. R. McFarlane, Harold Oiler and H. H. Crowell.

All tax rates will be approximately 25 per cent over this year due to the reduced valuation of property. The general tax rate is 6 1/2 mills, the school tax ranges from 2 to 16 mills and the hospital rate is set at one mill.

\$11,000 has been appropriated for municipal road construction and maintenance. The wage scale remains the same, namely, single hand, \$2.50; man and two horses, \$4.50; and man and four horses \$6.50.

The council approved a number of applications for seed oats, supplied by the dept. of agriculture. The department is supplying seed oats only this year.

Plans are being made to combat the grasshopper menace again. The Carbon mining station will put information as soon as necessary.

5000 FACTS ABOUT CANADA FOR 1935

The public will again welcome the annual issue of "5000 Facts About Canada," now in its 32nd year, compiled by the well known Canadian writer and lecturer, Frank Yule, and which has won a well deserved popularity for the conciseness and value of its information. It is truly a tidbit of information of the Dominion — Canada in a Nutshell — "a two" as Andy would say. Here within brief compass are all the salient features of the country for the current year, arranged under fifty chapter headings ranging from Agriculture to Yukon. This handy little volume — "a full of meat as a conciseness" — is a revelation of the progressive story of the Dominion in a single year, and should prove a source of encouragement to all and a revelation as well of the favorable trends of recent months. It tells Canada most effectively, and its wide circulation is good national business. Copies at 25 cents each or three for a dollar may be had from 588 Huron Street, Toronto or from leading newsdealers.

"I can't marry him, mother; he's an atheist and doesn't believe there is a hell."

"Marry him, my dear, and between us we'll convince him that he's wrong!"

CONSIDERABLE ROAD WORK TO BE DONE THIS YEAR

Representative of from the various Southern Alberta Municipalities who interviewed the Minister of Public Works in Calgary recently, requesting a bridge over Chatterbox Lake and the construction of a secondary highway connecting highways No. 2 and No. 3, through Grassland Municipalities were promised that the project would receive the consideration of the government.

This year there will be considerable road work done in Alberta and already the provincial government has voted a million dollars for road construction. Besides this, it is expected that the Dominion government will spend an additional million dollars on road work in this province, and hopes for long expected roads are being revived.

The Hanna Board of Trade is sponsoring a petition signed by several hundred residents of Hanna for the Hanna — Alameda provincial highway, asking for the graveling of this stretch of road. It is likely that graveling will be done this year.

WM. ABERHART TO BE LEADER OF SOCIAL CREDIT

Wm. Aberhart will probably be the leader of his social credit followers in the coming election campaign. Previously he stated that he would not seek election or take the active leadership, but at the recent Calgary convention delegates unanimously requested that he head the party.

The lady of the house was entertaining her brother child. When the sister of the day was raised from the bed of the stairs, she heard her hand fall for silence.

"Flash," he said softly, "the children are going to deliver their good-night message. It always gives me such a feeling of reverence to hear them. Listen."

There was a moment of tense silence, then, softly: "Mommy, Willie found a dollar."

"If you are a good little boy, I'll give you a brand new one."

"Aw, dad, couldn't you make it a old battered quarter instead?"

Spring Seeding Is Two Weeks Late: Weather

Previously the entire province was covered with a fall of snow over the week-end, and although temperatures did not go below zero, cold winds from the north brought winter weather with them. This added moisture was welcomed in most parts of Alberta and now that we have had our spring blizzards perhaps spring-like weather will follow.

Spring is late this year in fact later than for many years past. Last year the farmers were on the land by March 21st, and many had completed their seeding by April 1. Now with the first of snow which if weather conditions are favorable.

At the time of going to press Wednesday, practically all of the snow had disappeared and warm bright weather prevailed.

CANCER FUND

Boy Scouts in uniform will canvass in this district on Saturday, April 13th for the King George V Silver Jubilee Fund for Canada, according to word received from the Provincial headquarters at Calgary.

At each home or place of business, the scouts will leave an envelope bearing the name and address of the Countess of Beaulieu.

The scouts are not collecting funds. Those wishing to assist this worthy work will then enclose their contribution, seal and mail the envelope. They will also receive a permanent enrolment from Lady Beaulieu, enough from Ottawa.

674 BULLS SOLD AT CALGARY BULL SALE

674 bulls were sold at the annual Bull Sale, held last week in Calgary. The average price obtained was \$128.41 being \$11 higher than the average price last year.

A WELCOME DECLARATION OF WAR

The people of Canada, under the leadership of their Excellencies the Governor-General and Lady Bessborough, supported by the Dominion and Provincial Governments, all political parties, the churches, the press, the medical profession, and all patriotic Canadians, have united in a declaration of goodwill throughout the length and breadth of the Dominion, have decided to commemorate the twenty-fifth anniversary of the accession of King George V. to the throne of the world's greatest empire on May 6 by a declaration of war.

Canadians are a peace loving people; they abhor war, and their whole history proves that they never engage in war except when absolutely forced to it in self-defence, but, once in their fight to the finish with all the strength, energy and resources they can command. Fighting in their own defence they never remain on the defensive, but they adopt every effective tactic to bring about the defeat of the common enemy and safeguard their own existence. History proves this to be true.

So, with the lives of thousands of their people at stake, all Canada has decided to mark the Silver Jubilee of His Majesty, who has been well described as a kindly man and a mighty king, by a declaration of war upon the common world enemy—Cancer. The ammunition required to prosecute this war is—money. Money is necessary in the conduct of all wars, and in 1914-1919 Canada supplied it in the hundreds of millions, yes, billions. In this new and humanitarian war a substantial war chest is essential to success, although not in the enormous sums referred to above. Every Canadian family is asked to contribute to the extent of their ability.

Marking is termed to wage a continuing war against disease, and looking back over past years it is gratifying to know that, taken as a whole, it has been a successful war. A few years ago the great scourge was Tuberculosis, the White Man's Plague, which topped the list of diseases afflicting the race. To-day it is in retreat, now far down in the list, with a steadily diminishing number of victims.

Yellow fever, which once counted its victims by the thousands, is unknown; smallpox has been eradicated; diphtheria, which carried off children by the thousands, has been conquered through the discovery and use of anti-diphtheria serum; cholera, typhus, and other plagues are now practically unknown, with the result that the expectation of life has been more than doubled, nearly trebled, within the past 100 years.

On the other hand, the ravages of cancer continue to increase until to-day it is responsible for more deaths than any other disease with the single exception of diseases of the heart. Cancer comes second on the list and in 1932 was responsible for 10,646 deaths in Canada as compared with 7,944 only seven years previously in 1925, and the toll is progressively rising higher each year, having increased from \$3.9 per 100,000 in 1931-32 to 100 per 100,000 in 1932.

This is the common enemy that now calls Canada to arms and has resulted in this Silver Jubilee declaration of war.

Contrary to a view widely held, cancer is not an incurable disease. It can be cured if it is discovered and treatment commenced in its early stages. Early diagnosis is the all-important factor. But to secure early diagnosis involves, first, education of the public, the provision of a largely increased number of qualified diagnosticians, and facilities for treatment throughout the whole country. These are the essential munitions in this war, and they cost money.

The people of Canada, the rich, the merely well-to-do, even the poor, are called upon to enlist in the army of attack on this dread enemy which is one on the offensive against our people and securing a victory over us. As a Canadian people we must now take the offensive, take it boldly and in a large way, and fight to the end, to the last, and we will be victorious.

The idea of the "King George V. Silver Jubilee Cancer Fund for Canada" is an admirable one, it will be administered by trustees and every dollar will be spent in the service of Canadian lives. To establish that fund each Canadian family and household is asked to contribute one dollar, or as many more dollars as they can. Contributions may be sent to Lady Bessborough, Government House, Ottawa, who will acknowledge every donation received, large or small, on a card bearing the portraits of the King and Queen.

This does Canada propose to commemorate the Silver Jubilee of His Majesty by the creation of a permanent national anti-cancer fund. It will be an expression of the loyalty and affection of the Canadian people to His Majesty and at the same time a laudable, lasting and humanitarian record of a great national event.

We are glad to have the support of this column to the nation-wide appeal now being made in support of this effort to commemorate a reign that is one of the finest in British history in a manner which has received the gracious approval of His Majesty and as something designed to be of lasting value to suffering humanity.

The Right of Way

According to the new traffic regulations in England the pedestrian has the right of way and motor vehicles are not entitled to make anybody "pull back" at a crossing. The Mary-Kelene magistrate, Ivan Stoll, stated in fixing a woman motorist \$2.50.

A police judge says women now run 70 per cent. of the traffic. But men still hold the steering wheel.

Edwardsburg CORN SYRUP

Building Traffic Subways

Paris Found First One To Be Huge Success

Because of the success of the cars of the first traffic subways, Paris is pushing the construction of additional ones. Three passages are designed to insure the continuity of the circular road built in place of the former fortifications surrounding Paris. This road, complete, will be nearly 20 miles long, 133 feet wide, and will permit the passage of six rows of cars. Side walks on each side of the road are over three feet wide. Where this circular route meets the main arteries leading out of Paris it has been attempted, wherever possible, to direct traffic around a central plateau which serves as an axis. This eliminates to a certain extent the danger resulting from the crossing of cars from various directions and helps to reduce traffic tie-ups.

Arcades For London Streets

Expert Predicts City's Shopping Centres Will Be Covered

Women will soon be able to do all their window-gazing under cover in London, according to a merchandising expert, who says that the shopping centres will be a series of arcades. Manufacturers will emerge from the shelter of the stores, where they already are continuously on display, and appear in windows in place of the present ware figures, which have gone from the realistic to the fantastic and back again.

WAS CONSTIPATED FOR 30 YEARS

Woman's Long Search For a Remedy

The trouble with most remedies for constipation, as this woman found, is that they give only temporary relief. Having at last found a permanent cure, she writes to tell us about it.

"For upwards of 30 years I was a victim of acute constipation. It tried practically everything that it was possible to get. I admit I was a chronic case, and every new remedy I tried helped me for a day or two—after that I was just as bad as ever. Three months ago I took my first trial of Kruschen Salts, and every morning so long as I love, my first duty upon rising is my Kruschen. I honestly feel a different woman. My bowels act to the point, and my friends remark how well I am looking. My only regret is that I didn't try Kruschen years ago."

"For upwards of 30 years I was a victim of acute constipation. It tried practically everything that it was possible to get. I admit I was a chronic case, and every new remedy I tried helped me for a day or two—after that I was just as bad as ever. Three months ago I took my first trial of Kruschen Salts, and every morning so long as I love, my first duty upon rising is my Kruschen. I honestly feel a different woman. My bowels act to the point, and my friends remark how well I am looking. My only regret is that I didn't try Kruschen years ago."

Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The salts stimulate your internal organs to smooth, regular action. Your system is thus kept clear of those impurities which, allowed to accumulate, lower the whole tone of the system.

English Town Thirst

The changing times have not changed the Yorkshireman's thirst. When the people of East Winton in Yorkshire were invited to arrange their jubilee celebrations they found the village still had a balance left over from the spending of their Majesty 25 years ago. So East Winton will use it to celebrate their jubilee.

Object To Uniform

Typists of Turkey are angry over the threatened rule of the Turkish government that they must wear a standardized uniform. A bill introduced in the Angora parliament declares that the girls have dressed too frivolously, and they should wear a dark and simple costume. The typists declare such a rule would prevent them from developing their individuality.

Best She Could Do

A rubber stout woman was making herself a nuisance in the big shop which was holding its annual sale. Nothing, it seemed, would suit her, and the unfortunate shop-assistant was beginning to get a little weary. "Haven't you anything ready-made that will fit me?" asked the customer at last. "Yes, the umbrellas and the handkerchiefs are downstairs, madam," the girl replied.

"Growing" A Sea Wall

Rice Grass Effective In Preventing Flooding Of Land

The cultivation of rice grass on the low-lying lands of Essex and other similar mud flats in England may result in turning thousands of acres of waste land into profitable pasture. Spartina grass became known in Great Britain about 100 years ago through a few seeds dropping accidentally from some cargo ships at Southampton Docks. They took root and formed a hybrid with British grass which attracted the attention of agricultural scientists who saw the possibility of "growing" their sea wall instead of spending thousands of pounds on sea defence to prevent the land being flooded. Experiments have proved that such a wall is not worn away by the tide, and now Holland and Australia are planting rice grass with a view to converting large tracts of marshes into pastures.

Bonus Paid On Coal

Canada Has Paid Out Over Six Million Dollars Since 1925

Since 1925 Canada has paid \$6,787,176 in subventions and other forms of assistance to aid the coal industry in the Maritime provinces of Alberta, a return tabbed in the House of Commons last week. Of that amount \$4,457,962 went to the Maritimes and \$1,859,508 to Alberta. Payments made generally by the trade and commerce department to assist in placing Canadian coal used in the manufacture of iron or steel on a basis of equality with imported coal amounted to \$465,273, while "ad valorem" payments made under the Domestic Fuel Act to the Maritime coal industry totalled \$57,893.

From 1931 to the present the amount of bonus paid on wheat was \$123,758. The outlay in the year 1931-32 when the five-cents-a-bushel bonus was in effect was \$10,888,428.

Correspondence Of Kings

Findings In Palestine Date Back To 700 B.C.

The correspondence between two kings dating back to the time of Jerusalem, 700 B.C., has been found by the archaeological expedition led by Prof. J. L. Starkey, of Great Britain, it was learned. The discovery was made at Tel. Ad-Dunur, ancient city of Lachish. It consists of 12 Ostraka fragments, which are taken to be exchanges of secret letters between the kingdom of Judah and the kingdom of Babylon or Egypt. Details of the findings were made known to the Palestine government, but were not given out to the press.

Should Be Lucky

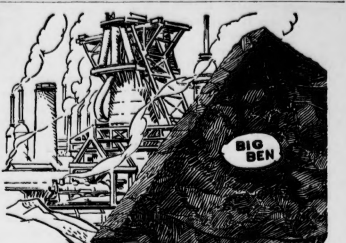

Schoolmaster In England Has Collection Of Unusual Horseshoes

A schoolmaster at Wimblish is an ardent collector of horseshoes. He specializes in ancient horseshoes. The walls of one of his rooms are covered with scores of them. They even overflow to other rooms. One of his horseshoes was discovered on the site of a Roman camp. In all probability it was cast from the foot of a charger ridden by a Roman general.

School Named After Prince

The Prince of Wales has consented to his name being given to a school for underprivileged boys established in British Columbia along lines identical with similar schools set up in Australia for some years past. The institution in British Columbia will be known as the "Prince of Wales Fairbridge Farm School."

It was a great Roman who said two thousand years ago, and it is still true, that those who take friendship from life blot out the Sun from the world.

Installs New Equipment

Montreal Institute One Of Leading Cancer Cure Hospitals

The Radium Institute of Montreal became one of the leading cancer treatment hospitals in the world with installation of apparatus generating 500,000 volts. The institute hopes to raise the voltage mark to 1,200,000 in a short while. Dr. J. E. Gendreau, director, announced.

"Ultra penetrating X-rays at a voltage of 500,000 were put in operation only after extremely careful physical measurements preparatory to cancer treatments, and the apparatus has been used for the first time on patients," Dr. Gendreau said. "This apparatus is the largest and most powerful in Canada and is surpassed by but a few in the United States or Europe," he said. He stressed the necessity of adequate institutions in different countries to fight cancer with great success.

The world has about six million square miles of ice to-day, most of it in Antarctica, but when the last ice age was at its height there was about twice as great an area of the world ice-blanketed.

Pedigree Certificates

The use of pedigree certificates registered by the Canadian National Livestock Records, approved by the Dominion Minister of Agriculture for the month of February 1933 was \$6,916, as against \$6,890 for February 1934. Horses numbered 228; cattle, 2,111; sheep, 481; swine, 450; dogs, 529; fowls, 2,926; poultry 180, and one goat.
